SUMMARY

Full-stack and AI engineer with 4+ years of experience shipping web applications end to end, from data model to deployment, working remotely with U.S.-based teams since 2023. Team contributor on two crypto payment products (a wallet and a point-of-sale system); builds AI apps that put LLM APIs into real user workflows. Core stack: React, Node.js, Express, MongoDB, Next.js, PostgreSQL.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, Python, Kotlin, SQL

Frontend: React, Next.js, Vite, HTML5, CSS, responsive UI, i18n (react-i18next)

Backend: Node.js, Express, Spring Boot, RESTful APIs, Socket.io, JWT, OAuth 2.0, Auth0

Databases: MongoDB (Mongoose), PostgreSQL (Prisma), MySQL, Microsoft SQL Server

AI & Cloud: LLM API integration (Anthropic Claude API, OpenAI Whisper), Vercel, Railway, AWS, Stripe, Cloudinary

Tools: Git, GitHub, Postman, Selenium, Agile/Scrum

EXPERIENCE

Cybermetis · Full-Stack & AI Engineer

Remote (U.S.-based) | Sep 2026 – Present

- Build full-stack features and AI-powered capabilities for a B2B/B2C platform in the cybersecurity space (details under NDA).
- Work across the stack, from front end to back end to LLM integration, with a U.S.-based team through daily standups and a pull-request review workflow.

University Teleinformatics Center (UTIC) · Software Development Intern

Sarajevo, BiH | Aug 2025 – Oct 2025

- Implemented backend data-validation and archiving logic for the university's academic management system using Spring Boot and Microsoft SQL Server.
- Improved the React front end's UI/UX and worked on performance optimization across the full-stack system.

Aurora Code Factory · Full-Stack Developer

Remote (U.S.-based) | Jan 2024 – Jan 2025

- Contributed React and Node.js features as part of the team building dPay, a cryptocurrency point-of-sale system that lets businesses accept payments in multiple cryptocurrencies.
- Collaborated remotely with a U.S.-based engineering team in an Agile/Scrum process.

Software Development Intern (promoted)

May 2023 – Jan 2024

- Contributed Node.js backend features to Dyos Wallet, a multi-currency crypto wallet for sending, receiving, and exchanging digital assets.
- Promoted to full-time Full-Stack Developer after 8 months.

Freelance · Full-Stack Developer

Remote | Jun 2021 – Present

- Delivered 10+ web applications for local businesses from concept to deployment, scoping each build to the client's needs, using React, Node.js, Express, and MongoDB.
- Built secure REST APIs with JWT and OAuth 2.0 (Auth0) authentication, paired with responsive, mobile-first React front ends.

PROJECTS

Vela: AI Relationship-Clarity App

React · Node.js · MongoDB · Claude API

- AI chat app for relationship clarity with a practice mode where the AI role-plays the other person and scores a debrief. Built with JWT auth, Whisper voice input, Stripe, and i18n.

Carina: AI Health Insights App

Next.js · PostgreSQL · Prisma · Claude API

- Designed and deployed a health-tracking web app that turns logged health and nutrition data into an AI-generated weekly briefing; took it from requirements to a deployed V1 in under two days.

AI CV Analyzer

MongoDB · Express · React · Node.js

- Full-stack app that analyzes resumes with AI, with user authentication and messaging services.

Personal Budget Tracker (Android)

Kotlin · Jetpack Compose · Room

- Native Android app built on MVVM and clean architecture, with Room persistence and StateFlow/Coroutines for reactive state.

EDUCATION

B.Sc. in Information Technology · International Burch University, Sarajevo, BiH

Jul 2026

Languages: English (professional working proficiency), Bosnian/Croatian/Serbian (native)
